

**HAPPY “LEONARDO DA VINCI’S BIRTHDAY” FROM THE LEWIS CENTER FOR EDUCATIONAL RESEARCH!**

As we celebrate the April birthday of the Italian genius Leonardo da Vinci by featuring his renowned Mona Lisa, we recognize him as one of the original out-of-the-box thinkers and problem solvers. Leonardo was the epitome of a Renaissance man, mastering each of his many careers—painter, sculptor, architect, musician, scientist, mathematician, engineer, inventor, anatomist, geologist, botanist and writer. At the Lewis Center for Educational Research in Apple Valley, CA, we clearly understand the importance of mastery. That’s why we have explored new educational frontiers for 25 years, creating an educational revolution aimed at helping students master their studies in new and highly relevant ways. We are giving our students, as well as students throughout the nation, the educational tools that will help them become the da Vincis of our day. By plotting bold courses of discovery, excellence and achievement, they will not only succeed, they will provide the future innovation, courage and commitment to lead a 21<sup>st</sup> Century Renaissance in America and throughout the world.
