

HAPPY NEW YEAR FROM THE LEWIS CENTER FOR EDUCATIONAL RESEARCH!

A shaft of light streams through the top of the Lewis Center's Observatory at its Academy for Academic Excellence in Apple Valley, CA. The observatory houses three telescopes for students to learn first-hand about mathematics and science. The Lewis Center is nationally renowned for its work with NASA and the Jet Propulsion Laboratory, including tracking the upcoming Lunar Crater Observation and Sensing (LCROSS) mission to the moon with the Goldstone Apple Valley Radio Telescope. K-12 Students throughout the world will be able to participate in the mission with an exciting new math & science curriculum that will soon be available on lewislearning.org.
